

PINCHAS HODADAD

Full Stack Developer skilled in both front-end and back-end technologies, with expertise in React, Node.js, and MongoDB. Proven ability to design and implement robust, scalable applications from the ground up. Experienced in leading development teams, collaborating closely with product teams in agile environments, and delivering secure, high-performance code. A proactive learner dedicated to clean, maintainable, and efficient solutions.

WORK EXPERIENCE

Makes

2021 - Present

Full Stack Developer (Tech Lead Role)

Link to app: <https://www.makesapp.co>

Makes is a Mobile-first learning app aimed at enhancing education for teens through gamified learning experiences.

- Developed the full-stack application from scratch using **React, Context, Redux, React Testing Library, Jest, Node.js, Express, MongoDB, and AWS**, creating a seamless user experience across front and back ends.
- Programmed the core features and functionalities.
- Architected a scalable solution that simplified feature expansion and onboarding, enabling faster integration for new developers.
- Optimized application performance by reducing front-end load times and improving server response efficiency, resulting in a more responsive and engaging user experience across devices.
- Mentored a team of 3 developers, resulting in increased team productivity and skill advancement, allowing them to independently handle complex features and improve code reliability.
- Collaborated closely with the product team in an agile environment to align development with product goals, ensuring features met user needs and business objectives.

Head fullstack trainer and content creator

Led a six-month bootcamp, equipping students to develop and deploy full-stack applications independently and transition seamlessly into tech roles.

- Boosted job readiness by designing a hands-on curriculum in HTML, CSS, JavaScript, React, Node.js, and MongoDB, achieving an 85% graduation rate with high job placement.
- Accelerated skill growth through live coding sessions, answering real-time questions, and reinforcing core coding principles.
- Elevated code quality via personalized code reviews, producing graduates proficient in best practices and clean coding.
- Built teamwork skills that enhanced students' problem-solving abilities for smooth integration into professional environments.

Teaching Assistant

- Supported instruction in web technologies.
- Assisted students in learning and problem-solving.
